

Education

University of Maryland Baltimore County - College of Engineering and Information Technology

May/2026

Bachelor's in Computer Science | GPA: 3.91

Graduated Magna Cum Laude | Presidents List 5x | Deans List 2x

Technical Skills

Languages: C++, Python, C, x86 Assembly, HTML, CSS, Haskell

Tools and Frameworks: GitHub, Word, Excel, Linux, Jira, Ida, Ghidra, x32debug, Netstat, Detect It Easy, Wireshark, FakeNet-NG, PE bear, Procmon, Matlab, Regex.

Experience

Web Developer

May/2026 – Aug/2026

Personal Project - <https://nanendae.github.io/Project-Portfolio-Website/index.html>

Responsible for researching, designing, and developing a personal portfolio website using HTML and CSS

- Self-taught syntax and semantics for HTML and CSS through MDN documentation and self-assigned test projects.
- Planned website layout, color scheme, and content to optimize visual clarity and intuitive page navigation.
- Coded HTML for web pages and CSS for style doc with Git version control and README documentation

Malware Analyst

Jan/2026 – May/2026

UMBC College of Engineering and Information Technology

Responsible for dissecting malware in a controlled environment.

- Ran and studied real malware in a secure VM using FakeNet-NG and used Wireshark to track faked network traffic.
- Analyzed strings and imported packages with PE-Bear and entropy levels in DIE to determine malware purpose.
- Utilized Ida and Ghidra to directly read malware assembly code to find entry points to be used for an unpacker.

Kernel Space Developer

Aug/2025 – Dec/2025

UMBC College of Engineering and Information Technology

Responsible for modifying and developing new systems for a custom Ubuntu Linux kernel in C

- Designed and developed shell that could run pre-existing commands and kept track of command history using forking.
- Implemented and compiled new system calls that ran circular & priority queues at kernel level with multi-threading.
- Created a custom filesystem with FUSE that supported base file operations & verified persistence across cycles.

Machine Learning Student

Jan/2025 – May/2025

UMBC College of Engineering and Information Technology

Responsible for researching and developing machine learning models

- Studied fundamental mathematics and techniques used in machine learning algorithms such as linear regression
- Programmed an 11-neuron neural network in google collab using python that would turn a 50,000 entry excel spreadsheet into usable data for training & testing sets. Attained a 78% – 94% prediction accuracy in testing.

Office Assistant

Jun/2024 – Aug/2024

Green Studio Builders Inc

Responsible for digital/physical file organization and rudimentary tech support.

- Reorganized an unsorted backlog of physical customer pay orders into a structured chronological filing system.
- Scanned and organized backlog of physical pay orders into a digital filesystem on company computers.
- Provided informal IT support to staff such as login issues, adjusting computer settings, and file backups.

Installation Assistant

May/2023 – Aug/2023

Poseidon Systems

Responsible for assisting with installing security and smart home systems

- Installed a variety of hardware including TV's, in-wall speakers, lighting systems, servers, and security cameras.
- Worked in a coordinated installation team at jobsites to complete jobs accurately within scheduled timeframes.
- Occasionally responsible for communicating with clients directly on jobsite through the installation process.

Loaner Car Front Desk

Jun/2022 – Aug/2022

Euro Motorcars

Responsible for attending the front desk for the loaner car section of a Mercedes-Benz dealership

- Worked with a team to assess, track, and assign loaner car vehicles and keys to ensure efficient pickup and return.
- Assisted customers directly from the front desk with vehicle/service questions, as well as filling out required forms.
- Helped customers unload any belongings during car return and guided them to where to pick up their vehicle.
