

NICHOLAS PAPADOPOULOS

240-640-2010 - chris20816@gmail.com - linkedin.com/in/npapadopolous - Bethesda, MD

PROFESSIONAL SUMMARY

Recent Computer Science graduate (Magna Cum Laude) with a broad technical foundation spanning frontend development, systems and kernel programming, computer networking, computer security, and artificial intelligence and machine learning. Comfortable working across the full stack, from low level systems code and network programming to user facing application design, with hands on experience in Agile team environments.

EDUCATION

University of Maryland, Baltimore County - B.S. Computer Science

Aug 2022 - May 2026

GPA: 3.9 | Magna Cum Laude | Computer Science - BS Departmental Honors

Baltimore, MD

- President's List (2022, 2023, 2024, 2025), Dean's List (2023, 2026), Semester Academic Honors (Spring 2024); Member, Phi Kappa Phi Honors Society

RELEVANT COURSEWORK

Computer Networks - CMSC 481

Jan 2026 - May 2026

UMBC Computer Science Department

- Studied every level of the TCP/IP model in detail such as time/frequency division multiplexing and NAT protocols
- Built a client-server dictionary lookup application in Python, communicating over sockets using IP addresses and ports
- Developed multiple versions of the server, some able to handle multiple clients at once using either threading or queueing

Frontend Developer - CMSC447

Jan 2026 - May 2026

UMBC Computer Science Department

- Worked on a team using AGILE methodology, organizing user stories and tasks on a shared Jira board
- Designed and coded Lofi and Midfi UI pages for application and wrote up SRS / Design Documents

Computer Security & Malware Analysis - CMSC246, CMSC449

Jan 2026 - May 2026

UMBC Computer Science Department

- Studied symmetrical and asymmetrical encryption algorithms and hashing methods
- Researched common web infrastructure vulnerabilities such as SQL injection and cross site scripting
- Performed malware analysis on real malware using PE tools, disassemblers, debuggers, and network monitors

Artificial Intelligence & Machine Learning - CSMC478, CMSC471

Jun 2025 - Dec 2025

UMBC Computer Science Department

- Designed and programmed a small-scale neural network to process structured data and make predictions
- Studied methods of creating AI / Algorithms using Reinforcement learning, Table Driven, and Utility based design techniques

Kernelspace Development - CMSC 421

Aug 2023 - May 2024

UMBC Computer Science Department

- Customized a linux kernel to include new syscalls, kernel modules, and a filesystem built from scratch
- Dissected broad and conceptual professor writeups for assignments and created actionable tasks

TECHNICAL SKILLS

Languages: C++, Python, C, x86 Assembly, HTML, CSS, TypeScript (introductory level), Haskell

Tools and Frameworks: Word, Excel, Linux, Jira, Ida, Ghidra, x32debug, Netstat, Wireshark, Fakenet, PEbear, Procmon, MatLab, Regex

WORK EXPERIENCE

Office Assistant - Green Studio Builders Inc

Jun 2024 - Aug 2024

Bethesda, MD

- Reorganized an unsorted backlog of physical customer records into a structured, chronological filing system
- Provided informal IT support to staff, including resolving login issues and adjusting computer settings
- Diagnosed a severe workstation performance issue and resolved it through a full backup, factory reset, and system restore

Installation Assistant - Poseidon Systems

May 2023 - Aug 2023

Rockville, MD

- Assisted in installing smart home systems and hardware, including TVs, speakers, lights, and security cameras
- Worked with a team of installers to coordinate efficient and fast installation

Loaner Car Front Desk - Euro Motorcars

Jun 2022 - Aug 2022

Bethesda, MD

- Worked with a team to document, assign, and transport loaner cars to and from clients at a Mercedes car dealership
- Assisted customers from front desk with loaner car documents and questions about newer loaner car models.
